- 40 Ph.d.’s

96%
We work with 24 of the 25 top pharmaceutical companies

18 offices
Global presence, local perspective

OUR UNFAIR ADVANTAGE FOR CLIENTS

LIVE IN DIGITAL
We start with digital because it’s where society learns, engages and transacts. This is how we all live.

DATA-DRIVEN
Analytics and insights power every facet of our organization telling us the who, where, what and why.

CREATIVE-MINDED
We always look for solutions that make the most sense and have the potential to surprise and delight.

HEALTHCARE GURUS
It’s who we are. From bench to bedside, from innovators to influencers, our expertise is unmatched.
Our proprietary, purpose-built social media analytics platform — the only tool of its kind on the market designed entirely for healthcare — allows for the rapid and easy identification of social media and trends among physicians, patient advocates, life science professionals and media. Combined with data from offline data sets, such as prescribing behaviors, medical claims, pharmacy claims and electronic health record data, we have a 360-degree view of patients and their care providers, giving us insights to help our clients improve clinical decision-making, patient access and health outcomes. Our creative, scientific and marketing communications teams use these insights to create impactful, award-winning campaigns. In partnership with our clients, we build value and brands based on insight and imagination.

W2O is the best agency I’ve ever worked with – and I have worked with many. They hire the best people who do quality, creative work, that is grounded in the science and data. They treat their people well and that translates to client service and satisfaction. Whether you have a large account or small, you are equally important by W2O.

- Amy Atwood, Head of Vaccine Communications, Takeda Pharmaceuticals
